Step into Experiential Learning with World-Class Amenities.

About Us

PHOENIX GRADUATE SCHOOL

PGS Global is a **UK-recognized** international education provider offering flexible and affordable academic and skill programmes, approved by the UK awarding bodies and accredited by the UK Universities, under **QS** and **OFQUAL** qualification frameworks.

Our programmes are delivered in campus, online and blended formats.

PGS Global offers quality education across the globe such as **Foundation, Undergraduate, Postgraduate** and **Doctorate programmes** as well as various professional skill programmes.

We use modern and innovative learning management systems and technological tools to deliver courses with lessons, resources and study materials. Our learning method is focused on **assignments** and **credits** and will genuinely enhance employability skills.

At PGS Global, our distinguished UK-trained and international faculty members will guide you in every step of your academic journey, to help you achieve an internationally recognised **WES-approved** qualification and a promising global career.

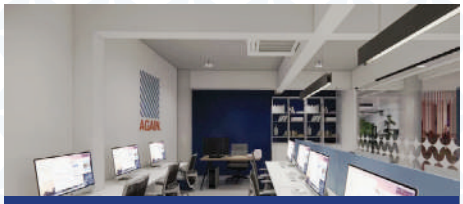

Our Campus at a Glance

Our state-of-the-art campus is more than just a place to learn - it's a space to grow, connect, and create. Spread across an expansive 50,000+ square feet, our campus is designed to inspire curiosity, develop collaboration, and prepare students for the global stage. Every corner is thoughtfully built to deliver experiential learning that combines advanced technology with an engaging academic environment.

Awarding Bodies

At Phoenix Graduate School, every qualification is a crafted testament to learning, where wisdom meets wonder, and knowledge finds form through trusted global alliances. We work in collaboration with distinguished awarding bodies such as Qualifi,OTHM and CPD under the quality assurance frameworks of Ofqual in England.

These esteemed institutions safeguard the integrity of every certification, from design to delivery, ensuring that each achievement reflects academic rigour, professional credibility, and genuine learning outcomes.

Each qualification, thus, becomes more than recognition; it is a symbol of mastery, curiosity, and the timeless pursuit of excellence.

Cybersecurity

From zero to deploy: securing systems, not just passing certifications.

Cybersecurity isn't just firewalls and passwords – it's a mindset and a discipline that spans prevention, detection, and response. The real shortage in the market isn't "people who can run vulnerability scans," it's in professionals who can assess risk, harden systems, respond to incidents, and align security with business impact :

Programme Levels

Level 1	:	Basic - Intermediate
	:	Duration : 3 months
Level 2	:	Intermediate - Advanced
	:	Duration : 6 months
Mode of Study	:	Campus/Online

Level 1 – Basic - Intermediate

Build security fluency – understand the core concepts, tools, and risks in a digital environment.

Focus Areas:

- Cybersecurity Foundations: CIA triad (Confidentiality, Integrity, Availability).
- Threat Landscape: Malware, phishing, ransomware, insider threats.
- Network Security Basics: IP, DNS, firewalls, VPNs.
- Endpoint & User Security: Password policies, MFA, secure browsing.
- Intro to Security Tools: Antivirus, basic SIEM navigation.
- Compliance Primer: GDPR, HIPAA, ISO 27001 basics.

Tools : Wireshark, Splunk, VirtualBox, Kali Linux (basic tools), password managers

Output : Mini-project – Conduct a basic vulnerability scan on a lab environment and produce a simple risk report with recommendations.

CAREER PROSPECTS

- Cybersecurity Intern
- Information Security Intern
- SOC Analyst Trainee
- Junior Security Analyst
- Network Security Trainee
- IT Security Support Associate
- Vulnerability Assessment Intern
- Security Operations Intern
- Cybersecurity Support Trainee

Level 2 – Intermediate - Advanced

Move beyond reactive awareness to proactive defense – implementing, testing, and monitoring security controls while strategically designing, leading, and automating enterprise-wide security programs.

Focus Areas:

- Security Operations: Log analysis, alert triage, incident workflow.
- Vulnerability Assessment & Penetration Testing (VAPT): Scanning, exploitation basics.
- Advanced Networking Security: IDS/IPS, segmentation, secure protocols.
- Cloud Security Fundamentals: AWS/GCP/Azure IAM, encryption, monitoring.
- Security Automation: Scripting for threat detection (Python, PowerShell).
- Digital Forensics Basics: Evidence collection, chain of custody.
- Threat Intelligence: Understanding IOCs, feeds, and threat actor profiles.
- Advanced Penetration Testing: Exploit development, red team tactics.
- Security Architecture: Designing zero-trust networks, secure DevOps pipelines.
- SOC Management: Incident handling at scale, threat hunting, playbook design.

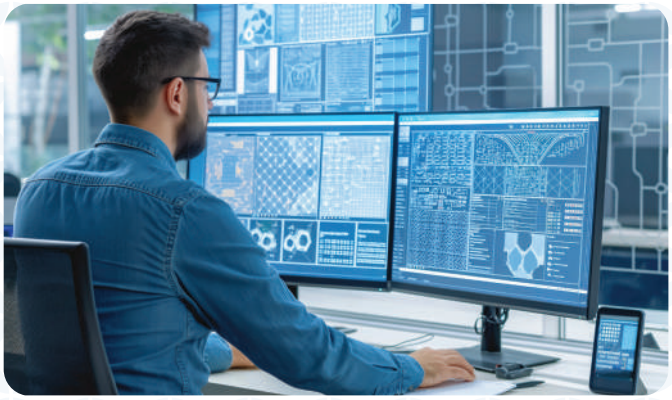

- Advanced Cloud & Hybrid Security: Multi-cloud security governance, container security (Docker/Kubernetes).
- AI & Security: Automated threat detection, anomaly detection with ML.
- Compliance at Scale: Mapping technical controls to SOC 2, NIST, PCI DSS.
- Cyber Resilience: Disaster recovery, business continuity, breach readiness drills.

Tools : Tools: Kali Linux (Nmap, Metasploit, Burp Suite), Splunk Enterprise, Elastic Security, Microsoft Sentinel, EDR (CrowdStrike, Sophos, Microsoft Defender), AWS CloudTrail, GuardDuty, Security Hub, Threat Intelligence Platforms, Terraform, Docker/Kubernetes, Python, Go (Automation).

Output : Final Capstone Project – Design, implement, and execute an end-to-end security assessment of a simulated enterprise environment, including automated detection and response pipelines, compliance mapping, and a board-ready executive summary with a comprehensive technical security report.

CAREER PROSPECTS

- Cybersecurity Analyst
- SOC Analyst
- Penetration Tester
- Ethical Hacker
- Vulnerability Assessment Analyst
- Network Security Engineer
- Incident Response Analyst
- Security Operations Engineer
- Information Security Engineer

Successful completion of our programme prepares you for the above-listed positions in multinational companies such as:

Google IBM Microsoft TESLA accenture
NVIDIA Infosys Adobe Flipkart amazon

At Phoenix Graduate School, we support your journey beyond the classroom with internship opportunities and placement assistance.

Please note:

- Internship and placement support is available to students who successfully complete the programme.
- These are opportunities and not a placement guarantee, and are subject to the student's merit.
- Opportunities in MNCs require an advanced skillset, not just beginner-level knowledge or training.

Learn well. Upskill continuously. Be industry-ready.

WHAT IS INCLUDED IN THE COST OF MY COURSE?

✓ Learn from experienced UK-qualified faculty
✓ Hands-on Learning Experience
✓ Digital and printed course materials, modules & video tutorials
✓ Virtual & on-campus classes by the UK-qualified faculty
✓ One-on-one tutor support and mentoring
✓ Course delivery by industry experts
✓ Active online forums for collaborative learning
✓ Assignment evaluation with detailed feedback
✓ Dedicated placement assistance

COURSE FEE STRUCTURE

	Duration	Online Fee	Campus Fee
Beginners + Intermediate	3 Months	₹ **49,999**	₹ **49,999 + GST**
Advanced	6 Months	₹ **94,999**	₹ **94,999 + GST**

*Terms and Conditions Apply

PGS GLOBAL JOURNEY

Unlock your potential

Upskill, reskill or pursue a passion with short courses across every subject, whether you're a beginner or already an expert.

- Enrol in the CyberSecurity programme
- Engage in learning with PGS Global
- Career-ready curriculum designed in line with global Cyber Scecurity trends
- Acquire skills in Cyber Security Basics and Advanced Modules
- Earn UK Awarding Body Certificate
- Be industry-readyand future-fit
- Become a Certified Cyber Security Professional
